Helen -

Herewith the material
we've been talking about.
I've kept the original of
your ER 1-6502, and
have noted the number
of the enclosures, as we'll
know where they are
if the subject ever comes
up again (perish forbid).

Thanks a lot.

(09862)

SUBJECT: Estimated Japanese Casualties in the China Area During Period 1937-1945 and Total Japanese Casualties in All Areas of the Pacific Theater During World War II

TO : Assistant Chief of Staff, G-2
Department of the Army
Washington 25, D. C.

1. Attached is a detailed report in reply to your radio request (DA 83286, dtd 13 Feb 51) for our estimated number of Japanese casualties in the China Area during the period 1937-1945 and the total Japanese casualties in all areas of the Pacific Theater during World War II. The attached documents, compiled by the First and Second Demobilization Bureaus, list the total known casualties by all causes during the period 7 December 1941 - 15 August 1945 and are the most accurate figures available.

2. A study of available Japanese records reveals that Japanese casualties from 1937-1945 were as follows:

China Area (1937-1941)	Army	168,807	
	Navy	7,345	
	Sub-Total	176,152	
China Area (7 Dec 41-15 Aug 45)	Army	203,851	
	Navy	39,197	
	Sub-Total	243,048	
Total China Area			419,200
Pacific Area (7 Dec 41-15 Aug 45)	Army	1,289,605	
	Navy	439,505	
Total Pacific Area			1,729,110
GRAND TOTAL			2,148,310

3. Attention is invited to the large number of Japanese who perished in the Southwest Pacific Area during the course of World War II. The figure reached almost half of the grand total of Japanese killed in all areas of combat. The toll in the Philippines was particularly heavy. The figures for SWPA are as follows:

SECRET

I 1816

SECRET

<u>Area</u>	<u>Army</u>	<u>Navy</u>	<u>Total</u>
New Guinea	104,963	19,223	124,186
Philippines	367,058	103,059	470,117
*Solomons	58,782	35,072	93,854
**Netherland East Indies	56,872	10,323	67,195
Borneo	<u>10,412</u>	<u>5,504</u>	<u>15,916</u>
Total	598,087	173,181	771,268

*Includes Guadalcanal

**Does not include Sumatra

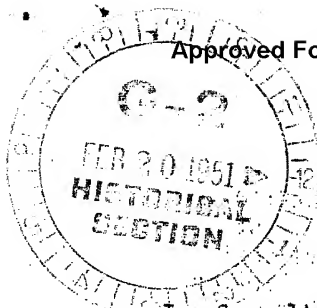

NOTE: Figures include civilian personnel attached to both services.

Demob Bureau Casualty Rept
(7 Dec 41-15 Aug 45)

SECRET

DEMobilIZATION BUREAU
REPatriation RELIEF AGENCY

I. Casualties of Japanese Military Servicemen and Civilians
(including death caused by battle) during the Period of
Pacific War (from 7 Dec. 1941 to 15 Aug. 1945)

II. Number of the dead (war-dead and the dead caused by battle):

A. Ex-Army Servicemen and Civilians.

- (a) Deaths whose records of death exist 1,240,075
- (b) Presumed number of deaths whose records do not exist (deaths whose obituary notices were issued but no record exist and presumed deaths whose obituary notices were not issued). 49,530
- (c) Total 1,289,605
- (d) Break-down by geographical areas for the death is as shown in Table No. I attached.

Note 1: The above number is the total of figures resultant from the investigation into eighteen kinds of documents concerning the deaths now kept by each Assistance Section, such as 'Roster of the Dead' and 'List of Ashes' prepared by each Assistance Section and the roster, etc., prepared and submitted by each City, Town or Village Office. 770 man-days were spent in the above investigation.

Note 2: Presumed number of deaths whose records of death do not exist in (b) above should be mentioned as 'about 50,000' but the results of summing-up was mentioned above intact.

- (e) I-1 and III-1, Separate Sheet of FDB 538, in Reference (3) above shall be abolished.

B. Ex-Navy Servicemen and Civilians.

- (a) Total of deaths 439,505 (equals to the figure mentioned in I-2, FDB 538, Reference (3) above).
- (b) Geographical break-down for above is as shown in the Table II attached.

Note: This table was prepared by investigating into the documents concerning the dead by each District Demobilization Liquidation Division and the results of which was summed up by the Second Demobilization Bureau Liquidation Division.

III. Number of the wounded:

A. Ex-Army Servicemen and Civilians.

- (a). Those who have taken proceedings for pension for functional impediments and the records exist: 33,967
- (b) Those who have taken proceedings for pension but no record exists and presumed number of those who are expected to take proceeding for pension newly in the future: 19,061
- (c) Total 53,028
- (d) Geographical break-down for above is as shown in the Table III attached.

Note 1: Those who have taken proceedings for pension for functional impediments are the wounds stipulated in the Enforcement Regulations of Pension Law' of 1923--in short, functional impediments still left in the little finger of one hand or that in two toes of three toes except the first and second toes of one foot even after the medical treatment for more than three years.

Note 2: There may be a good many persons wounded slighter than above and the number of them can only be calculated based on presumption as this Bureau has no reliable data.
In the first report concerning the number of the wounded Navy Servicemen and Civilians, the Second Demobilization Bureau Liquidation Division has had the data with which the total of the wounded was presumed as many as 6.5 times as that of the pensioners. But with regard to the former Army there is no such data and it is unreasonable to apply above ratio of the Navy to that of the Army.

Should that ratio be applied the total of the wounded of the former Army would be about 340,000. Moreover it is impossible, for the following reasons, to apply the ratio of the killed and the wounded basing on the historical statistics in former wars to that of the Pacific War.

Note 3: The number of the wounded is exceedingly smaller than that of the deaths being totaled about 1,300,000, which is unprecedented.

This is probably resultant from the fact that the wounded succeedingly took part in the battles without having been evacuated and were killed in them or died after they had been wounded.

Note 4: The figures were the results of the investigation conducted by the Assistance Sections in each prefectural Government into all the documents concerned--eighteen kinds in all including the documents submitted by the offices of each city, town and village.

2,290 man-days were spent in this survey.

Note 5: The presumptive number in (b) above should be 'about 20,000' but the results of summing-up was mentioned above intact.

B. Ex-Navy Servicemen and Civilians.

51,745 (equals to the figure mentioned in II-2, FDB 538, Reference-(3) above.)

The above figure cannot be geographically broken down as there is no record.

FOR THE DIRECTOR:

Tamuo Kate

Chief, Liaison Section
Demobilization Bureau

Area	Break-down		Deaths whose records exist					records of death not exist		Total	Grand-total
